Webcast 29 June: EMEA Tax Talk (Termin 4)

We are delighted to invite you to the second session of our EMEA Tax Talk webcast series: "The Future of VAT Starts Now: Mastering ViDA", taking place on Monday, 29 June 2026, from 14:00 to 15:30 CEST.

Change is coming, and fast. ViDA marks a turning point for VAT in Europe, introducing a new era of real time digital reporting, mandatory e-invoicing, modernised platform economy rules, and a streamlined single VAT registration. For businesses operating across the EU, the question is no longer if to prepare, but how quickly and how effectively.

Join our EU VAT specialists as they break down the latest ViDA developments, unpack what the adopted measures really mean in practice, and share concrete strategies to help your organization stay ahead of the curve.

In this session, we will focus on the practical implications of ViDA for your day-to-day operations, translating regulatory developments into clear, actionable steps. We will cover key areas such as ERP and system readiness, process redesign, and risk mitigation, highlighting where immediate action is required and how to establish a robust implementation roadmap. As always, this will be a two-way conversation, so please bring your questions, your challenges, and your own experiences to enrich the discussion.

The webcast will be held in English and is free of charge. You can register or cancel your registration using the button above, which will direct you to your personal event page with all the details.

Reserve your spot today, we look forward to connecting with you!
