Webcast 10 September: China's regulation on AI, Data and Information Security

New and existing regulations on AI, data security and governance are shaping how MNCs operate in China. Join PwC's leading experts from Germany and China, alongside CIOs from German HQ and their APAC/China operations, for a one-hour webcast and learn about recent regulation updates, how to adapt operational setup and mitigate corresponding risks. We will share practical use cases, and show how leading companies operate in the light of evolving regulations in China and Europe and might even turn regulatory challenges into a competitive edge for their global operations.
