A Deep Dive Into Pre-Trained Transformer Application

In the last three blogs about NLP, we have provided a broad overview of NLP use cases in business and a demonstration of text generation using pre-trained transformer models.

Content

Introduction

The understanding of the benefits to the business of applying Natural Language Processing (NLP) technologies in a number of use cases may awaken your interest. The poem and article composed by the AI relating Shakespeare to climate change may have impressed you (see our previous blogs). But we still need to face the missing link: **the application – a solution specialized for the circumstances**.

In this article, we will cover:

- Transformer-based large language models

- An application solution leveraging the power of NLP

- Basic operations of the NLP models and fine tuning
