## Webinar: EMIR 3.0 – Navigating Active Account Requirements

16 December 2024, 12:00 to 13:00 CET

EMIR 3.0 introduces pivotal changes to the central clearing, risk management, and reporting of derivative transactions. A key element is the new mandate requiring EU counterparties to establish an active account at an authorized central counterparty (CCP) within the EU and to clear a representative number of interest rate derivatives through this account. The active account requirement must be implemented by the end of June 2025.

Join our experts as they guide you through the nuances of EMIR 3.0, providing you with critical insights and strategies to address the business and operational implications proactively. Gain a strategic advantage by understanding the steps counterparties need to take now to comply with the active account requirement.

The webinar is free of charge and will be held in English.
