ESG in the insurance industry: a holistic integration into your business

The topic of ESG has become increasingly important for insurers, and is here to stay.

ESG has far-reaching implications for the insurance industry - as asset owner and for insurance products as well as in your own operations. The issue is complex and brings many uncertainties. The recently published [Insurance ESG Whitepaper "Embracing ESG - How insurers turn ambition into action"](#) sheds light on the darkness.

How can ESG be integrated into your companies' strategy and governance - beyond regulatory requirements? How can your company manage ESG risks and efficiently process ESG data - both for reporting purposes and for internal steering?

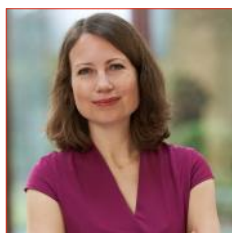

Learn more about this in our new blog post: ["Embracing ESG: How insurers turn ambition into action"](#)
